

# ATOMIC PHYSICS 4

---

Editors

G. zu PUTLITZ

*Conference Chairman*

E. W. WEBER

and

A. WINNACKER

*Physics Institute, University of Heidelberg*

PLENUM PRESS • NEW YORK AND LONDON

## Contents

Edward Uhler Condon - a Personal Recollection . . . . .	1
Lewis M. Branscomb	
E. U. Condon - the Physicist and the Individual . . . . .	5
I. I. Rabi	
Perspectives on "The Theory of Atomic Spectra". . . . .	13
B. R. Judd	
New Developments in Level Crossing Spectroscopy . . . . .	19
N. I. Kalitejewski and M. Tschaika	
Correlations of Excited Electrons . . . . .	47
U. Fano and C. D. Lin	
The Search for Violation of P or T Invariance in Atoms or Molecules . . . . .	71
P. G. H. Sandars	
Rydberg Constant . . . . .	93
Theo W. Hänsch	
A New Value of the Fine Structure Constant from Helium Fine Structure . . . . .	105
Michael L. Lewis	
Recent Fine Structure Measurements in Hydrogen- Like Atoms . . . . .	119
Francis M. Pipkin	

Preliminary Experimental Results on the Energy Difference between the $2S_{1/2}$ and $2P_{3/2}$ Levels of the $(\mu^4\text{He})^+$ System . . . . .	141
A. Bertin, G. Carboni, J. Duclos, U. Gastaldi, G. Gorini, G. Neri, J. Picard, O. Pitzurra, A. Placci, E. Polacco, G. Torelli, A. Vitale, E. Zavattini, and K. Ziock	
Particular Properties of Hadronic (Exotic) Atoms . . . . .	163
G. Backenstoss	
The Vacuum Polarization Correction in Muonic Atoms . . . . .	191
R. Engfer and J. L. Vuilleumier	
The Decay of the Neutral Vacuum in Overcritical Fields . . . .	209
Berndt Müller, R. K. Smith, and Walter Greiner	
The Quasi-Molecular Model of Atomic Collisions . . . . .	249
William Lichten	
Radiative Transitions in Quasi-Molecules . . . . .	287
F. W. Saris and F. J. de Heer	
Superheavy Quasimolecules . . . . .	301
P. H. Mokler, S. Hagman, P. Armbruster, G. Kraft, H. J. Stein, K. Rashid, and B. Fricke	
Model and Pseudopotential Calculations . . . . .	325
A. Dalgarno	
Eikonal-Born Series Methods in Electron-Atom Scattering . . .	337
F. W. Byron, Jr.	
Interaction of Low Energy Positrons with Gaseous Atoms and Molecules . . . . .	355
P. G. Coleman, T. C. Griffith, G. R. Heyland, and T. L. Killeen	
Threshold Processes in Electron-Helium Scattering . . . . .	373
F. H. Read	
Electron Scattering by Laser Excited Atoms in well defined States . . . . .	381
I. V. Hertel	
Electron Transfer in Simple Atomic Collisions: Recent Theory, Experiment, and Applications . . . . .	397
James E. Bayfield	

Low Energy Electron-Molecule Scattering . . . . .	435
K. Takayanagi	
Electron Photon Coincidences and Polarization of Impact Radiation . . . . .	449
H. Kleinpoppen	
The Negative Hydrogen Ion and Its Behaviour in Atomic Collisions . . . . .	487
John S. Risley	
Intramultiplet Mixing and Depolarization in Atomic Collisions . . . . .	529
E. E. Nikitin	
The Spectra of Colliding Atoms . . . . .	559
Alan Gallagher	
Collision Studies with Ion Storage Techniques . . . . .	575
G. H. Dunn	
Optical Pumping with Lasers . . . . .	589
C. Cohen-Tannoudji	
High Resolution Spectroscopy by Means of Tunable Lasers and Atomic Beams . . . . .	615
Pierre Jacquinot	
Quantum-Beats and Laser Excitation in Fast-Beam Spectroscopy . . . . .	635
H. J. Andrä	
Cascade and Stepwise Laser Spectroscopy of Alkali Atoms. . .	651
W. Happer	
New Results Obtained on Electronic Excited States of the $H_2$ Molecule by Methods Involving Coherence or Doppler- Free Effects . . . . .	683
J. C. Pebay-Peyroula	
Photoionization and Autoionization of Excited Rare Gas Atoms . . . . .	713
R. F. Stebbings, F.B. Dunning, and R. D. Rundel	
Structure Information from Atomic-Beam Magnetic- Resonance Studies of Many-Electron Atoms . . . . .	731
William J. Childs	
Many-Body Effects in Atomic Hyperfine Interaction . . . . .	747
Ingvar Lindgren	

AUTHOR INDEX . . . . .	773
SUBJECT INDEX . . . . .	775
