

# ATOMIC PHYSICS 2

Proceedings of the Second International Conference on  
Atomic Physics, July 21-24, 1970, Oxford

---

Conference Chairman

**G. K. WOODGATE**

*Clarendon Laboratory  
Oxford University  
Oxford*

Edited by

**P. G. H. SANDARS**

*Clarendon Laboratory  
Oxford University  
Oxford*

 **PLENUM PRESS • LONDON - NEW YORK • 1971**

## CONTENTS

Preface	vii
The Present and Future State of Quantum Electrodynamics ..... <i>S. J. Brodsky</i>	1
P- and T- Violations in Atomic Physics ..... <i>E. D. Commins</i>	25
Field Distribution Measurements by the Molecular Beam Method. <i>J. G. King and T. R. Brown</i>	33
Recent Advances in Beam-Foil Spectroscopy..... <i>S. Bashkin</i>	43
Advances in Spectroscopic Instrumentation ..... <i>P. Bouchareine</i>	67
Polarization of Ions and Electrons by Optical Pumping Techniques <i>L. D. Schearer</i>	87
Isotope Shifts and Nuclear Physics..... <i>D. N. Stacey</i>	105
Optical Pumping of Radioactive Atoms..... <i>E. W. Otten</i>	113
Ion Cyclotron Resonance Experiments ..... <i>M. Bloom</i>	127
Coincidence Techniques in Scattering ..... <i>H. Ehrhardt</i>	141
High Resolution Molecular Beam Scattering Experiments at Thermal Energies and the Determination of Intermolecular Potentials by Direct Inversion of the Scattering Data..... <i>H. Pauly</i>	155
Interatomic Forces Derived from Spectral Data ..... <i>W. R. Hindmarsh</i>	171
Some New Molecules for Molecular Beams..... <i>D. Kleppner</i>	177

Low-Noise Spectroscopy .....	183
<i>D. E. Blackwell</i>	
Resolution of the Density Operator into Irreducible Tensor Components and Applications to Experiment .....	191
<i>A. Omont</i>	
Theory of Complex Spectra .....	201
<i>S. Feneuille</i>	
The Atomic Structure of Super-Heavy Elements .....	215
<i>R. D. Cowan and J. B. Mann</i>	
Many-Body Perturbation Theory Applied to Atoms.....	227
<i>H. P. Kelly</i>	
Many-Electron Correlations in Atomic Electron Shells and Possible Ways of their Experimental Detection .....	249
<i>M. Ya. Amusia</i>	
The Three-Particle Problem in Atomic Physics.....	271
<i>E. Gerjuoy</i>	
Phase Shift Analysis of Electron-Atom Scattering.....	289
<i>M. R. C. McDowell</i>	
Slow Collisions of Positrons in Gases.....	307
<i>H. S. W. Massey</i>	
Classical Approach to Atomic Theory—Correspondence principle for strongly coupled states.....	345
<i>I. C. Percival</i>	
The Direct Particles Theory in Quantum Electrodynamics .....	371
<i>F. Hoyle</i>	
Index .....	383
