

Acknowledgment

We wish to acknowledge our depth of gratitude to many individuals who so generously gave of their time in serving as referees for manuscripts submitted to *The Journal of Research on the Lepidoptera*. The quality of work which now appears in this journal has shown consistently higher standards as a consequence. We particularly appreciate the promptness with which reviews are received. Although publication may be delayed for various reasons, the first courtesy to authors is return of comments on their works in a timely manner. This is a courtesy virtually all reviewers have graciously extended. The following listing cites those individuals who have served as referees to date, covering papers which have appeared and will yet appear into volume 22.

Philip Ackery	Glenn Gorelick	Austin Platt
